EmPower Program

Assisted Home Performance Program (AHP)

Home Performance with EnergyStar® Program

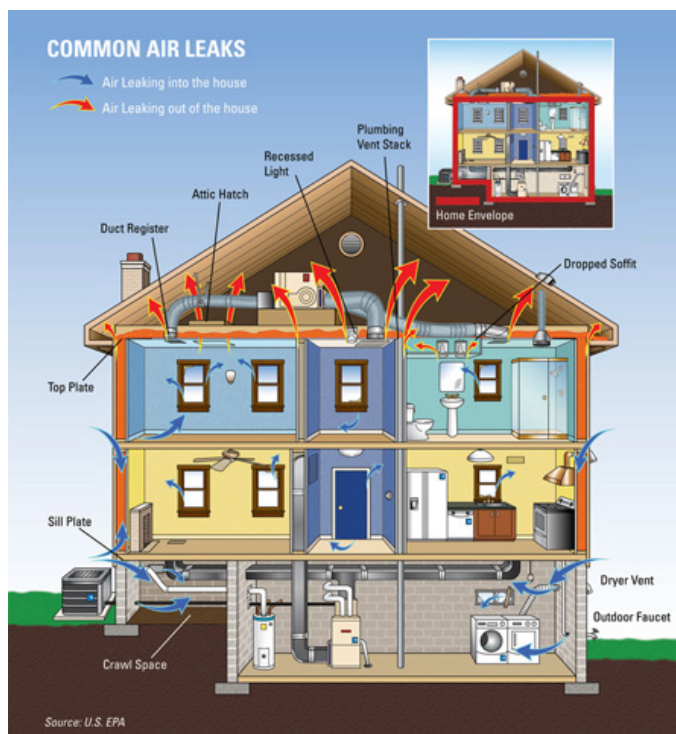

EmPower is an energy efficiency initiative run by **NYSERDA**, with two tiers: Electrical Reduction (ER) and Home Performance (HP). For those who qualify, you are entitled to a wide range of energy reduction work including, but not limited to, the replacement of incandescent bulbs with efficient CFL bulbs, installation of smoke and carbon monoxide detectors, installation of water-saving aerators and showerheads, wrapping of pipes and hot water tanks, and maybe even a brand new, free refrigerator!

For those qualifying for the Home Performance tier, you are entitled to everything Electrical Reductions tier offers, and you may receive free insulation and air sealing work in your attic/basement. These measures help an eligible homeowner reduce monthly utility bills by improving a home's efficiency. You may save thousands of dollars a year in heating, cooling, lighting and electrical expenses.

Not a homeowner? Don't worry, you may still qualify as a renter!

If you don't qualify for the EmPower Program, don't fret, there are still great options available for you! The **Assisted Home Performance Program** is very similar to EmPower. Homeowners who qualify may have up to 50% of the work done for free. Like EmPower, the AHP Program helps those in need reduce their monthly utility bills while improving quality of life, and a home's efficiency by utilizing a variety of state-of-the-art energy-saving techniques.

**You can receive
a free audit with each program.**

The Green Jobs | Green New York program is open to any homeowner in New York State making up to 400% of the state median income. The first step is a comprehensive, free energy audit, which will be conducted by one of our certified energy auditors. After the audit, we will present you with a detailed and scientific explanation of how much energy your home is wasting, as well as proposed improvements to your home which can save you thousands of dollars each year.

Green Jobs | Green New York offers a variety of flexible financing options, including low-interest loans and "On-Bill Financing" which allows you to pay back the loan right through your utility bills. If energy upgrades aren't in the cards for you at the time, you can still take advantage of the free energy audit without any commitment to getting the work done.
